

MOTIVATION LETTER

I would like to express my willingness to apply and become accepted to your internship program at [COMPANY] with this letter. My main motivation is gaining the invaluable experience while working with your organization and successfully applying it as a powerful advantage in the search of the job in the future.

The internship I apply for means a lot for me. Firstly, I do not get a lot of practice just going to college and I am limited to accumulating theoretical knowledge, and my practical skills require more practice. Moreover, I believe that the amount of knowledge I have would be sufficient enough for successful applying of at least part of it while working at [COMPANY]. Also, since telecommunications is the industry that never stops and keeps developing gradually, internship at your organization would allow me to stay up-to-date and help others in mastering the necessary skills. Finally, I would like to assess my skills and qualifications in terms of professional qualification; taking an internship with you would bring up the weak sides I have and allow me to work on eliminating them in the future.

In order to get better acquainted with the peculiarities of modern information and communication technologies one may wish to read a lot of books and study the latest publications. I agree this is useful, but it would not satisfy my needs and demands. As mentioned above, I look forward to gaining vitally important experience in the field of telecommunications, as this would allow me to grow professionally and understand the concepts I study at college as a student. I also hope to understand the common algorithm that allows your organization to change as soon as it is required and always fit the innovational standards of information and communication technologies field. I believe that my hard work, dedication and responsibility would be seen as a positive aspect while selecting me for the abovementioned internship opening.

Looking forward to your positive reply and ready for the interview at any time.

Best Regards,
